

Create & Share

Digital Sharing If you want to be able to share your photos with family and friends digitally, there are many options available, with most cloud services having the ability to share. There are also photo-sharing apps and websites available.

Slideshows are a nice way to digitally share your photos and videos, as are digital photo frames with many frames of excellent quality now on the market. Most frames are wireless, meaning the images can be uploaded via the internet or via email.

If you love the idea of digitally sharing your photos and videos with family and friends, but are unsure of how to go about it, Simone from *YOUR PHOTOS FILED* can help in the following ways:

- * Provide recommendations on the cloud service best suited to your needs
- * Provide recommendations on photo sharing apps
- * Create slideshows using your favourite images and videos
- * Provide recommendations for digital photo frames that suit your specific circumstances and budget, and assist with setting up the frame including image selection and preparation
