

Create & Share

Photo Books A fabulous way to share memories and they look great in the home; on shelves or on the coffee table. Photo Books can be created as a way to commemorate special events such as weddings, birthdays and school graduations. They are also an excellent way to capture holidays and make great family year books. They can be created for all sorts of reasons and for all sorts of projects and are important family heirlooms.

Photo books also work well for businesses and organisations as a way to tell their story or showcase their product or service.

If you love the idea of photo books, but don't know how to go about the process of creating them, Simone from *YOUR PHOTOS FILED* can help.

From the images you supply, Simone will determine which ones will work best to tell your story. She will do any necessary editing to the images to make them look great in print and from there, will professionally design your book working closely with you from start to finish.

Your book will be professionally printed using high quality, lay-flat paper.
